

Jared Stone

1. I would like to be an ASG officer to provide equitable representation for all students and bring additional transparency to the office of Treasurer. I expect to have the opportunity to collaborate with student leaders from the respective colleges at UAMS to 1) encourage students to recognize Associated Student Government as a valuable resource, and 2) empower ASG representatives to serve as a unified voice for students.
2. I believe that my background in biological sciences and business, work experience in the healthcare field, and current pursuit of a master's degree in healthcare management will provide the appropriate expertise to be successful as an ASG officer. I have experience in research and research administration from my undergraduate education, as well as work experience in the Veteran Affairs Healthcare System as a laboratory assistant and research administration assistant. Additionally, my role as a medical scribe exposed me to the clinical side of healthcare and the importance of documentation, coding, and billing. As an officer for ASG, I would possess the skills necessary to address the concerns of individuals from different healthcare disciplines. Further, my current education in financial management of healthcare systems will sharpen my skills in accounting and budget maintenance.
3. ASG/Intramurals provide students with an opportunity to develop relationships with each other outside the classroom in fun activities that promotes student health and wellness. In addition, intramurals promote teamwork, an integral component of excellent healthcare delivery.
4. Three goals I would like to accomplish by the completion of my first year as an officer include: 1) provide quick updates on the ASG budget at monthly meetings, 2) allow ASG representatives to have input on resource allocation, 3) maintain an accurate record of expenditures including documentation of transactions. I will accomplish these goals by focusing on transparency and equitable representation amongst ASG members and the UAMS student body.
